# How do bees make honey?

By Sam Buckwell

## Bee Colonies

- Honey bees live in groups called colonies.
- Thousands of female Worker bees collect nectar from flowers.
- Processor bees make the nectar into honey.

## Nectar

---

- Worker bees fly from flower to flower collecting nectar.
- They use their long tongue called proboscis to suck up the nectar.
- The nectar goes into the worker bees tummy and turns into sugar.

## Bees making honey

---

- (Please do not be offended this is quite gross)
- The worker bee vomits the nectar into a processor bees mouth!
- There is a chain of vomiting bees - the sugary nectar is broken down in their stomachs

## Bees making honey (2)

---

- A bee finally vomits the nectar into honeycomb to store it.
- The nectar is still watery so bees go really close to it and flap their wings until it turns into a thick liquid, called HONEY!

YUMMMMMMY!!!!!!!!!!!!!!!!!!!!!!!!!!!!  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Lesson 5: Mini-beast Monday 11th May 2020

Worker bees visit flowers that have nests. They suck up the nectar from the flower. They store it in their tummy. After they return to their hive, the bee tells the other bees about this to make a bee. and he store it into the honey comb.

Monday 11th May 2020

1. Worker bees visit flowers with their tongues they suck up nectar from flowers.

2. They store it in their tummy.

3. They go back to the hive and turn the nectar into sugar

4. They vomit nectar into the processor bees

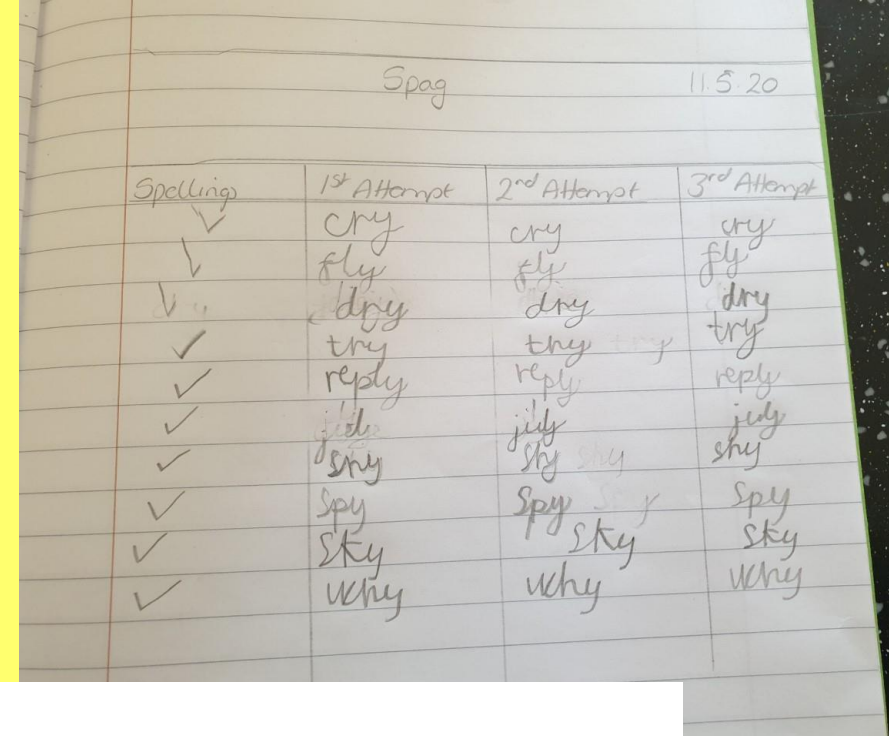

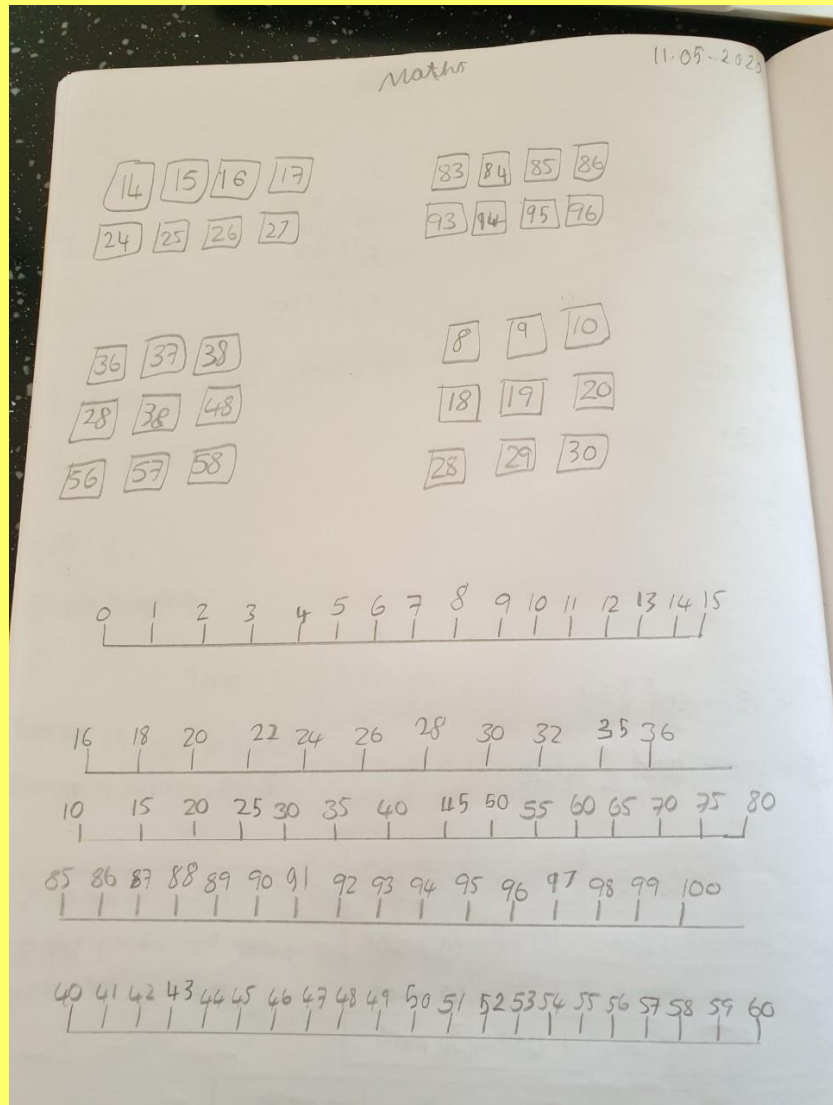

5. The bees move honey from their tummy into their mouth

6. The honey mix goes into the honeycomb

7. The bees flap their wings to evaporate the water

8. Now there is thick honey

Toby's SPaG, maths and mini-beast work.

### The Tadpole's Promise – Created by Milo Dias

In a small pond by a park, there lived a beautiful rainbow caterpillar and a tiny black tadpole. One day they fell in love and the caterpillar said to the tadpole "Promise you'll never change" but when they met again the tadpole had grown two legs. This made the caterpillar feel sad and worried. She then said again "Promise you'll never change". The tadpole couldn't help it and the next time they met, he had grown two arms. "You've broken your promise two times" said the caterpillar. "Forgive me" he begged.

The next time they met, the tadpole had lost his tail. The caterpillar cried and said "You've broken your promise three times now".

The caterpillar curled up and went to sleep and she thought she would forgive the tadpole but then she met a frog and she said to the frog "have you seen my shiny black..." but before she could say pearl, the frog leaped up and ate her in one big gulp.

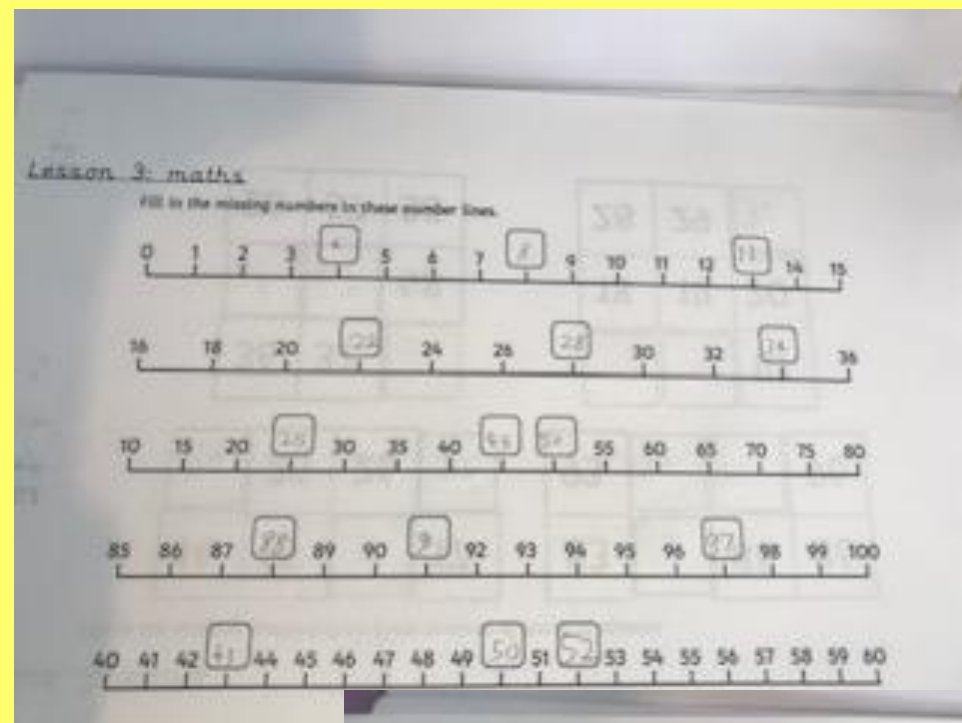

The End.

Milo's maths, SPaG and his story.

Ava's SPaG and maths.

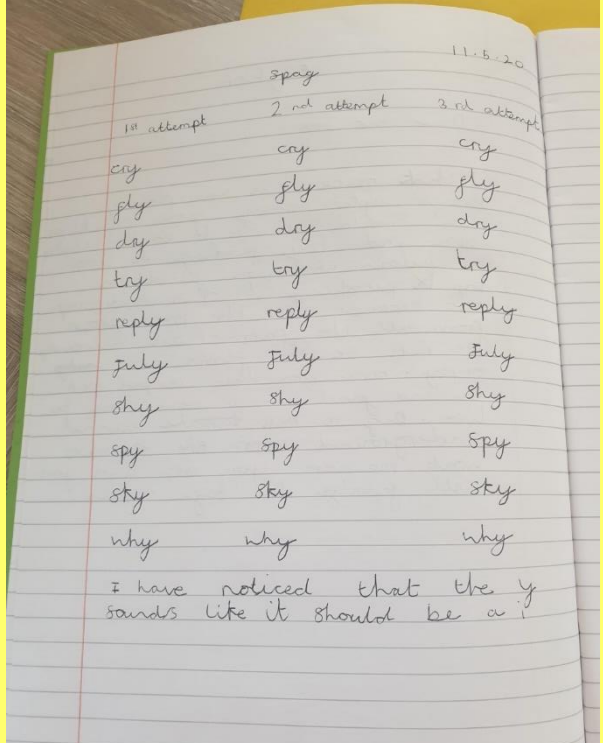

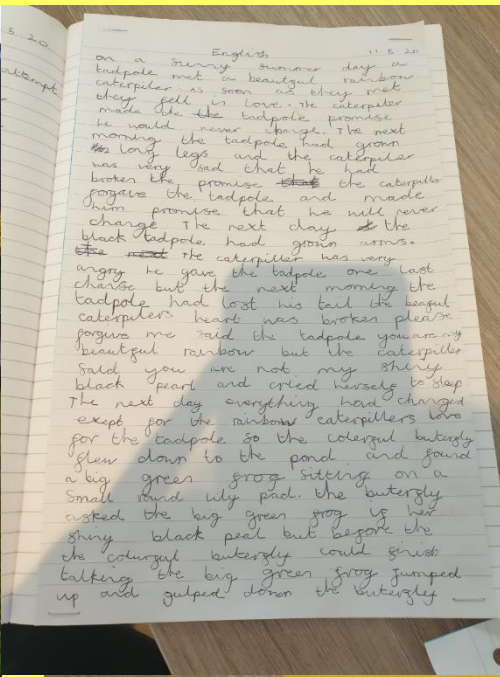

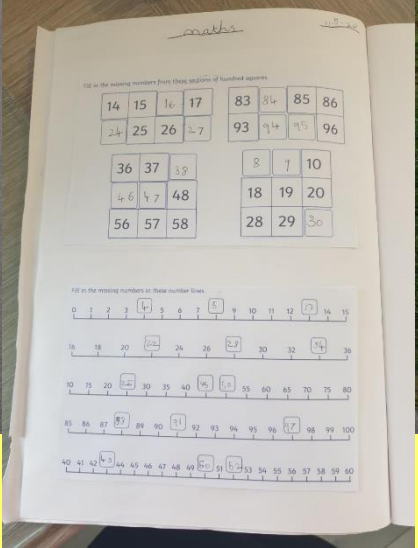

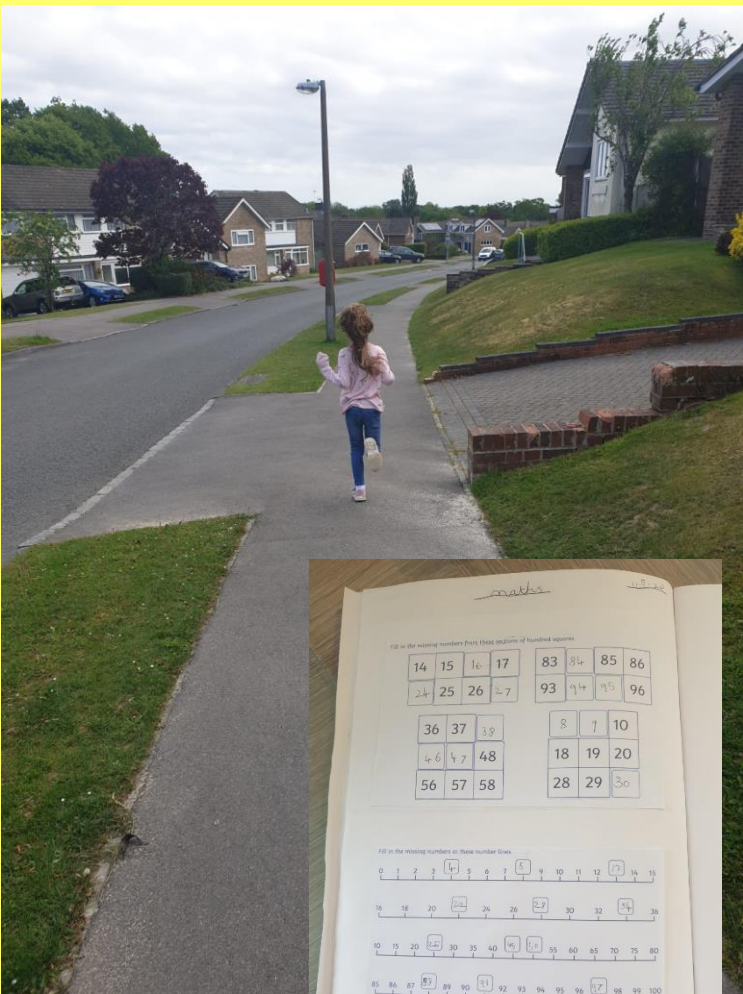

Zac's maths, SPaG and mini-beast work.

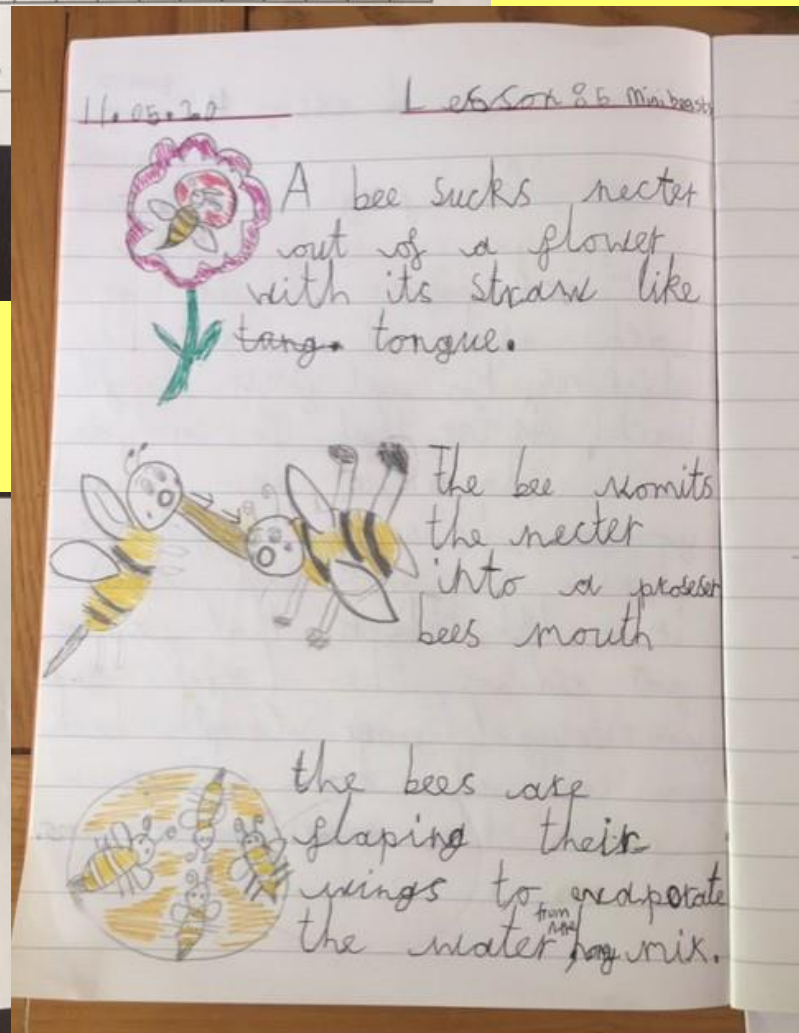

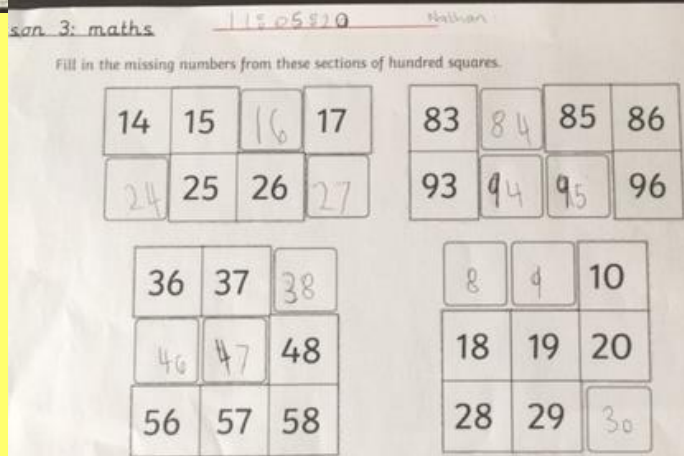

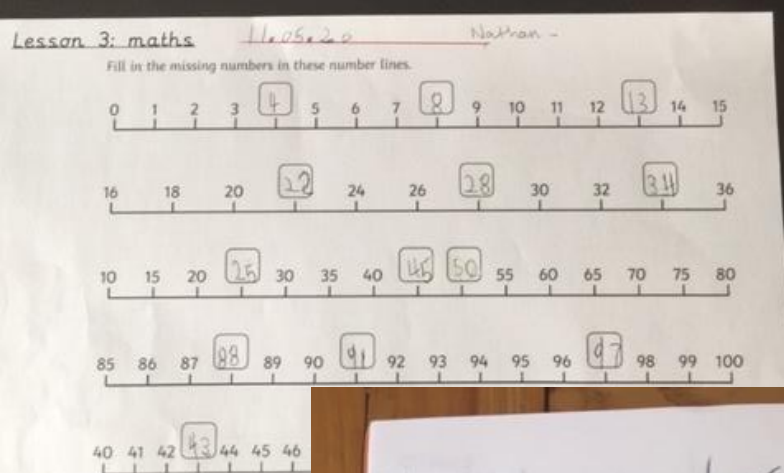

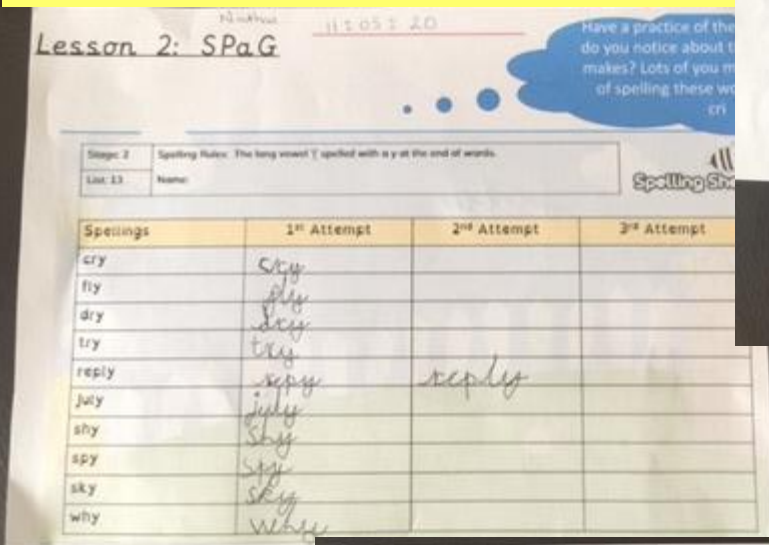

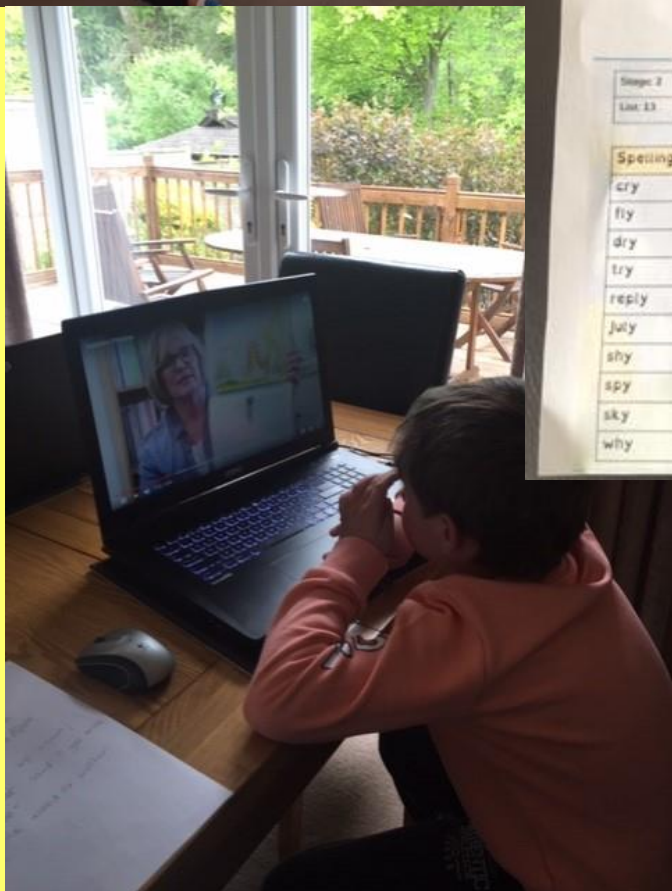

Evie's work.

Nathan's work.

Nathan's work.

The Tadpole promised as told in Nathan's words.

- The Tadpole said he would never change.
- He swam away, he evolved into a tadpole with two legs.
- Then they met up again!
- ↓ The Caterpillar said "you broke your promise."
- ↓ The tadpole asked for another chance.
- ↓ The Caterpillar gave him another chance.
- ↓ He swam away.
- ↓ The next time they met he had grown two arms.
- ↓ The Caterpillar said that's twice you have broken your promise.
- ↓ The tadpole asked for forgiveness again he said he only wanted his beautiful rainbow.
- ↓ The Caterpillar said I will give you one last chance.
- ↓ Next time they met he had no tail. She did not forgive him this time she said "You're not my shiny black Pearl."
- ↓ The Caterpillar went away and evolved into a butterfly.

She forgave the tadpole and went to look for him.

- ↓ Then she found a frog sitting on a lily pad she asked him if he had seen her shiny black pearl.
- ↓ But the frog leapt up and ate her up!
- ↓ The frog still waits for his caterpillar.

The End.

How Honey's Made

My opinion :  
Bees live in a Colney .  
They make us honey .  
Did you know that you  
can get dandelion honey .

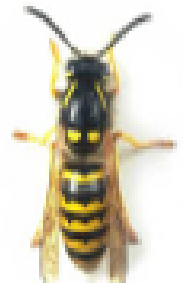

# Bees

HONEY BEE

BUMBLE BEE

WASP

# Honey

Nectar when collected from the flowers has lots of water . This water needs to be taken out of nectar to make honey as honey contains just about 14-18% of water.

In order to extract honey from nectar, bees get to work and Fly up to 55000 miles to collect nectar out of flowers and visits about 100 flowers!

The worker bees store this nectar in the sacks in their stomachs known as a honey stomach where the sugar is broken up into small pieces. When their honey stomachs are full of nectar, they go back to their hive. Here the worker bees from inside the hive take up the honey and store in the hexagonal cells and seal these cells with wax.

While in the cell, the bees flap their wings rapidly to remove water.

By Theodore

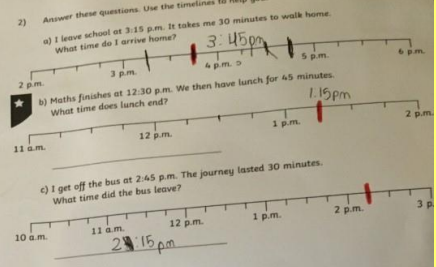

Theo is tasting his dandelion honey.

- 1 Bees collect sugar water from lots of flowers. It is called nectar.
- 2 They take it to their own hive.
- 3 Their tummy starts to mix glucose and the fructose.
- 4 Then the forager bee transfers it to a younger bee it vomits.
- 5 They do this several times.
- 6 Finally it moves the sugar mix into the honey comb.
- 7 The worker bees fan it so the water goes away.

Lottie's work and she found a bee.

Vomit

The First they go  
 to a glacier and suck  
 it in <sup>near</sup> there tunnel.  
 Next they vomit  
 it into another mass  
 town they put it  
 in to a big box.  
 After that they glue  
 there wings to get them  
 out. It is now honey.

one tadpole promised that he would never change for his whole life.

As seasons passed by, the tadpole grew a tail. The caterpillar was very angry at the tadpole and she said, "what's that on your back? I think you broke your promise. That's not fair." The tadpole said he doesn't know what happened, but he will keep his promise.

As days went by, the promise had not gone as planned. The tadpole now had two legs. The caterpillar was very very cross. "This is the second time you are breaking my promise." I am very frustrated. I am never going to speak to you again," said the caterpillar. She then went back to the willow trees and cried and slept in a leaf.

One shiny moonlit night everything changed. The stars changed, the river changed, the trees changed. The tadpole couldn't keep his promise and now he has become a frog. The caterpillar woke up from her deep sleep. She was ready to fight her black shiny pest, the love of her life. She had changed into a beautiful butterfly. She flapped her wings and flew down the willow tree. She saw a frog sitting on a leaf and asked him, "Excuse me, have you seen my bf."

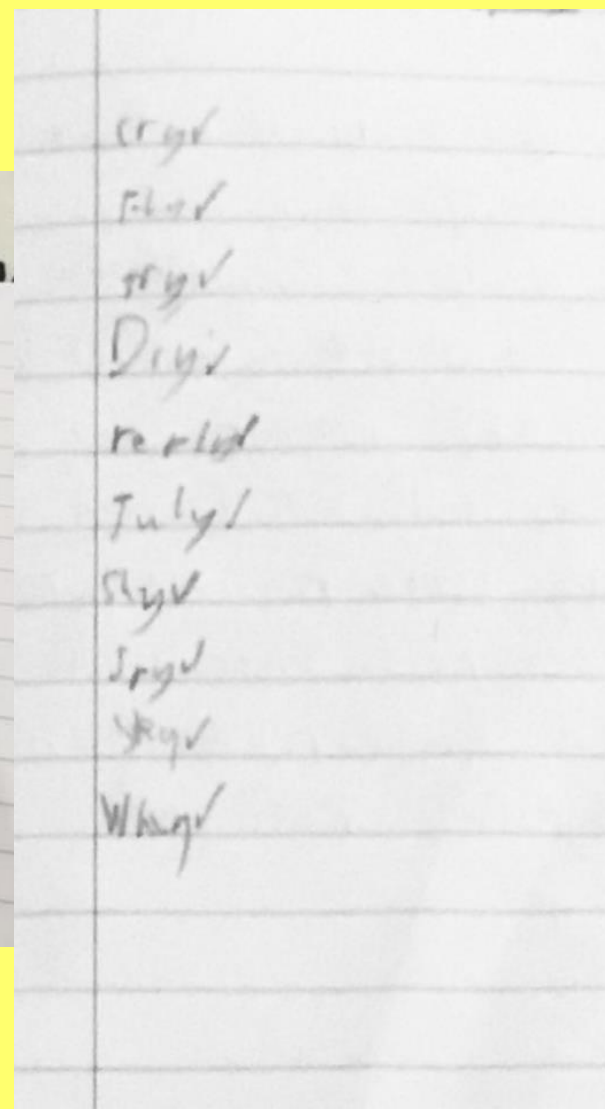

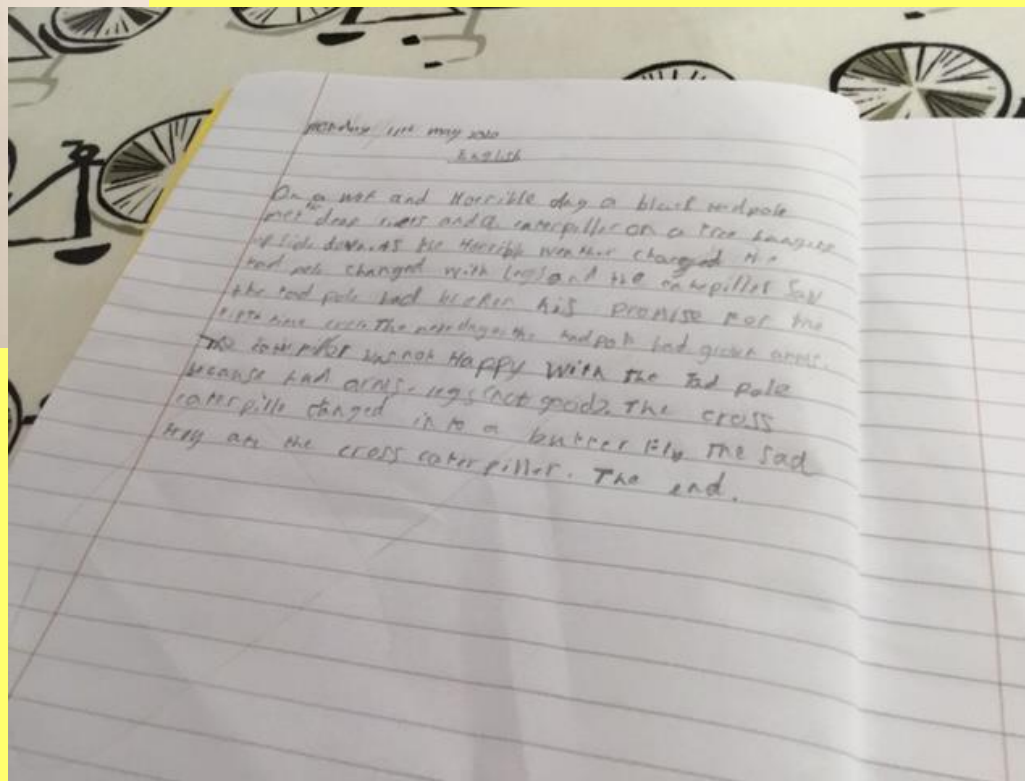

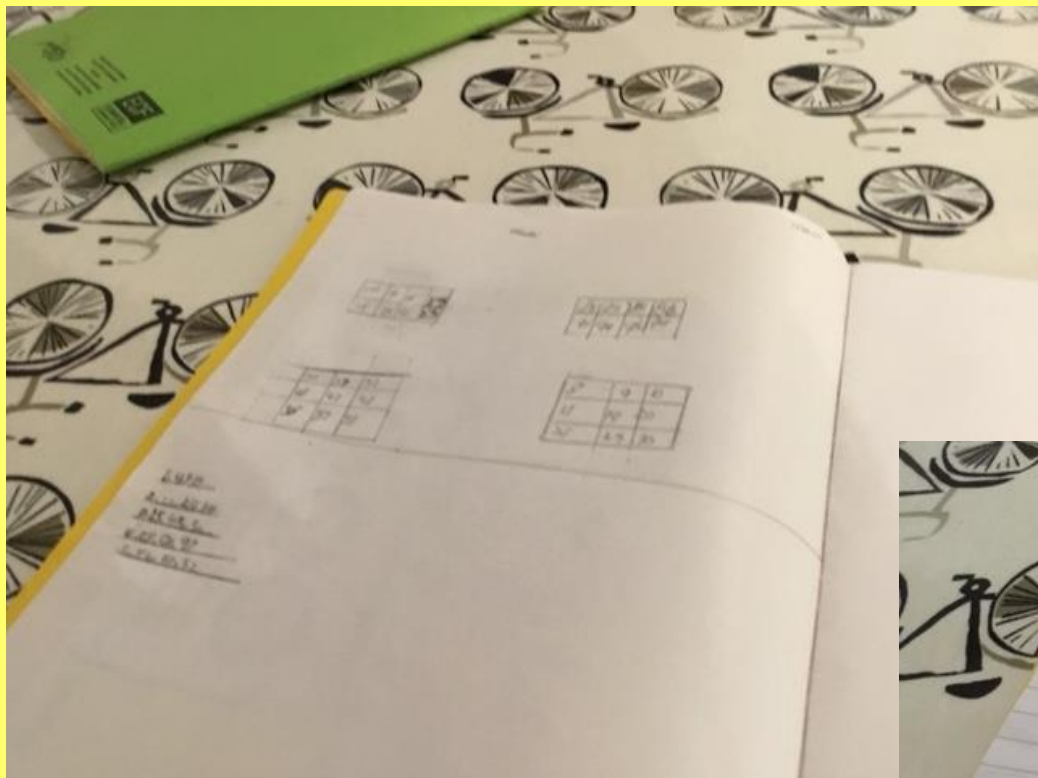

Before she could finish, the frog stuck his long tongue and gobbled the caterpillar in one big gulp "SLURP".

The frog sat on the leaf wondering where his beautiful rainbow caterpillar went.
